

# UBBB Quickview

Transition Level / Altitude	FL110/9000ft
Stations	UBBB_DEL: 135.7 UBBB_GND: 121.7 UBBB_TWR: 119.2 UBBB_DEP: 120.8 UBBB_APP: 129.3 UBBA_CTR: 133.1
VOICE-ATIS available	<b>YES.</b> XT-Division highly recommend to use VOICE-ATIS wherever available

Departures	
Initial climb clearance	5000ft
Squawk Code	Use SSR feature of AURORA or 1000
Handoff TWR to higher Station	When airborne
Handoff APP/DEP to higher Station	Clear aircraft to FL140, handoff not later than FL120

Arrivals	
Descent clearance from CTR and handoff	Descent to FL120, handoff to APP not later than FL140
STARs vs VECTORS	XT-Division highly recommend to use STARs and to use shortcut directs on STARs, however VECTOR service available on Pilots request. ATC must ensure MRVA limitations.
Handoff to TWR	Handoff to TWR when Pilot reports established on approach given by ATC.

Gates and Parking Stands	
International	A1 – A12
